

Data Acquisition System

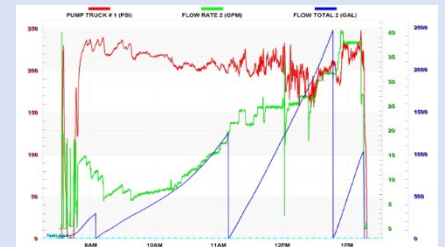

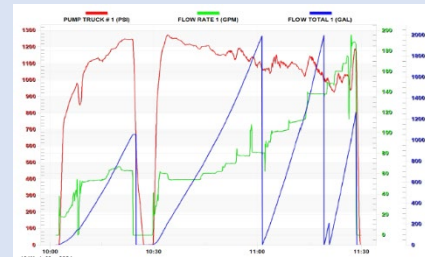

Job Analysis

Shows all details of your job including start and end times, products used, and location details.

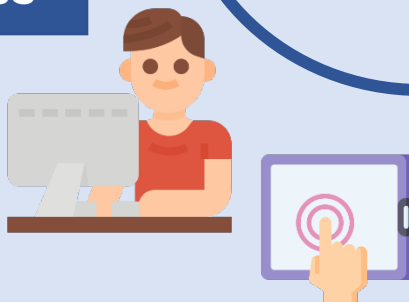

Graphed Report

This graph shows the rate, pressure, and total flow over the duration of the job.

Remote Access

The DAS gives customers the ability to view the job **live** from their computer, tablet, or phone.

Flexibility

Live access to CCA jobs is a great feature for customers who are on-the-go attending meetings, designing new jobs, or visiting other job sites.

Safety

The DAS acts as a safety device because it has an Electronic Kickout. Before each job, this is set to the customer's requirements. This feature ensures the safety of people, the environment, and equipment.
